

Please let XM radio continue to offer all of its services including traffic updates around the country. I travel extensively on business as well as pleasure with my family. The traffic update service is invaluable for me. It saves me time. I am paying for this service, as well as the other valuable services XM has to offer. We should not hinder technology or competition. the reason I have XM is because of the boring programing & non stop comercials of traditional radio. I do not want to wait on a travel updates while these stations play music I don't want to hear as well as the unnerving commercials. XM radio promotes safety on the road. My stress level has lowered immensely since I started listening. The constant uninterrupted traffic updates helps me to avoid congestion thereby lowering my stress behind the wheel. Saving time on the road with a 4 & 7 year old because of XM traffic updates is a Godsend. You know kids ask every few minutes "are we there yet?" have you ever sat in a traffic jams with tired kids?

If these lobbyist of the radio owners have their way on this issue they will not stop. They will contiune to attack XM radio on other fronts as well. I am willing paying for the XM services. Please let them stay intact & expand.

thank you.
